Northcentral Technical College is an equal opportunity/access/employer and educator.

Photography is one of Katy's newest passions in life. While attending UW Oshkosh, Katy enrolled and completed a study abroad course on photography in London, England. She has since completed a digital photography course at NTC.

Baseball, specifically Milwaukee Brewers Baseball, is another of Katy's passions. You could say when Katy enjoys something she throws herself into it head first. Katy enjoys going to games and has fallen in love with the idea of working in sports promotions.

As a college student at UW Oshkosh and NTC, Katy has become involved in the campus and student governing. She has been involved on several boards throughout both college experiences and has held positions involving government policies and activities boards. Katy loves to be involved.

Katy Herron is an enthusiastic, hard-working, dependable individual who enjoys a variety of activities. As a student, she has developed an intense interest in advertising, graphic technologies and photography. Katy has completed her bachelor's degree in Journalism: Advertising and Public Relations at the University of Wisconsin Oshkosh, and is currently working to complete her associate's degree in Graphic Communications Technologies at Northcentral Technical College.

Katy is experienced in many different work fields from student work in graphic design to working as an Advertising Account Executive for the local radio station WCYE 93.7. Katy has knowledge and experience in the many different facets of advertising from sales to creation. Experiencing the many different parts of Advertising as a profession, Katy has learned that she enjoys the creative aspects much more than sales and has taken the appropriate educational steps to move toward this.

Katy is a hard worker and loves promotions work more than any other aspect of marketing. With the combination of advertising, public relations, events planning, graphic design, editing and photography skills she can be a one-woman-show when it comes to promotions if need be. Although she has skills and the experience needed to do things on her own, Katy enjoys working in teams and has collaborated in creating and promoting hundreds of events during her college years. This includes the UW Oshkosh major concert in the spring of 2008 and many annual events for the University of Wisconsin Oshkosh.

All photography shot and created by Katy Herron in various places from London, England to Milwaukee, Wisconsin.
